

Master Reference: Intelligent Document Analysis Framework

This document defines the complete ontology for "Smart Template" configuration, bridging business needs with technical AI execution.

1. Exhaustive Analysis Catalog (Logical Engines)

This table defines the type of analyses that can be requested.

Category	Activity Type	Input Mode (<i>Multi-doc template vs Single-doc template</i>)	Objective & Description	Target Expertise
Comparison	Comparison	Multi	Identify points of convergence and divergence.	Professional
	Benchmarking	Multi	Evaluate against a standard (ISO, industry, internal).	Expert
	Gap Analysis	Multi	Measure distance between current state and target.	Expert
	Redlining / Delta	Multi	Extract precise changes between two versions.	Auditor

Evaluation	Evaluation	Single	Judge reliability, efficiency, or quality.	Professional
	Ranking	Multi	Order based on performance or importance criteria.	Executive
	Scoring	Single/Multi	Assign numerical scores based on metrics.	Expert
Diagnostic	Anomaly Detection	Single	Spot irregularities, errors, or fraud.	Auditor
	Root Cause	Single	Identify fundamental origin of an incident.	Expert
	Forensic Analysis	Single	Reconstruct history to understand past events.	Auditor
	Conflict Detection	Multi	Detect contradictory clauses or data.	Auditor
Prediction	Trend Analysis	Single	Project trends from historical data.	Professional
	Forecasting	Single	Predict future	Expert

			events based on signals.	
	Scenario Modeling	Single	Simulate results based on parameter variation.	Executive
Prescription	Decision Support	Single/Multi	Provide structured analysis to aid choice.	Executive
	Decision Optimiz.	Single/Multi	Recommend the "best" logical decision.	Expert
Structural	Dependency Mapping	Single/Multi	Visualize causality or hierarchy links.	Expert
	Taxonomy / Classif.	Single	Organize info into predefined categories.	Professional
Semantic	Thematic Analysis	Single	Identify central themes and key concepts.	Professional
	Sentiment / Tone	Single	Evaluate psychological posture or mindset.	Professional
	Fallacy Detection	Single	Detect reasoning errors and logic flaws.	Expert

2. Results Catalog (UI Rendering)

This list defines the different ways how the analysis can be rendered.

A. Short Answers & Summaries

- **Single Sentence:** Direct and ultra-concise response.
- **Executive Summary:** 3 impact points and 1 strategic recommendation.
- **Bullet Points:** Ordered list of essential information.

B. Business & Strategic Models

- **SWOT Matrix:** Strengths, Weaknesses, Opportunities, Threats.
- **PESTEL Analysis:** Political, Economic, Social, Tech, Environmental, Legal.
- **Porter’s 5 Forces:** Analysis of competitive pressure.
- **BCG Matrix:** Stars, Cash Cows, Question Marks, Dogs.
- **Value Chain:** Analysis of value creation stages.

C. Technical Diagrams & Modeling (Mermaid/SVG)

- **UML Diagrams:** Sequence, Class, Activity, State Machine, Component, Deployment.
- **Enterprise Arch.:** Archimate (Business, Application, Technology, Motivation).
- **Process Mapping:** BPMN, Flowchart, CI/CD Pipeline.
- **Data Modeling:** ER Diagram, Snowflake/Star Schema, Ontology Model.
- **C4 Model:** Software architecture visualization.

D. Security & Risk Frameworks

- **MITRE ATT&CK:** Matrix of adversarial tactics and techniques.
- **STRIDE / DREAD:** Threat modeling and risk assessment.
- **CVSS Score:** Vulnerability severity calculation.
- **NIST Framework:** Alignment with cybersecurity pillars.

E. Project Management & Planning

- **Gantt / PERT:** Project schedule and time dependencies.
- **Kanban Board:** Task status and workflow.
- **Roadmap:** Macro-temporal vision of deliverables.

3. Advanced Parameters for Smart Templates

This table defines the parameters that can influence how the analysis is done.

Parameter	Description	Typical Options
-----------	-------------	-----------------

Thesaurus	Priority industry lexicon.	Pharma (HL7), Aero (ASD), Finance, Legal
Logic Depth	AI reasoning level.	Chain of Thought, Fast Response, Deep Audit
Evidence Level	Depth of provided proof.	Full Snippet, Page Reference, None
Visual Style	Aesthetic of diagrams.	Minimalist, Detailed, Hand-drawn
Language	Result target language.	Source, FR, EN, ES, DE
